

Titus-check

The Titus-check is a checklist with the 18 criteria that are enumerated in Titus 1:6-9, describing the core tasks and competencies associated with being a spiritually mature person or an elder. Circle for each criterium whether it needs improvement (n.i.), is sufficient (suff), or is good. Did you circle "n.i." or "no" somewhere, then briefly explain why you did so and determine for yourself what you intend to do about this and by when. Answer the questions truthfully. You are personally responsible for the consequences of falsely representing the way things are. We recommend you to also let two other persons fill out this checklist for you, so that you become a 360°-observation on where you stand.
